What is Lightcast Data? .....	1
Report Parameters .....	2
Executive Summary .....	3

## What is Lightcast Data?

Lightcast data is a hybrid dataset derived from official government sources such as the US Census Bureau, Bureau of Economic Analysis, and Bureau of Labor Statistics. Leveraging the unique strengths of each source, our data modeling team creates an authoritative dataset that captures more than 99% of all workers in the United States. This core offering is then enriched with data from online social profiles, resumés, and job postings to give you a complete view of the workforce.

Lightcast data is frequently cited in major publications such as *The Atlantic*, *Forbes*, *Harvard Business Review*, *The New York Times*, *The Wall Street Journal*, and *USA Today*.

## Report Parameters

### 1 Occupation

31-1131 Nursing Assistants

---

### 1 County

6099 Stanislaus County, CA

---

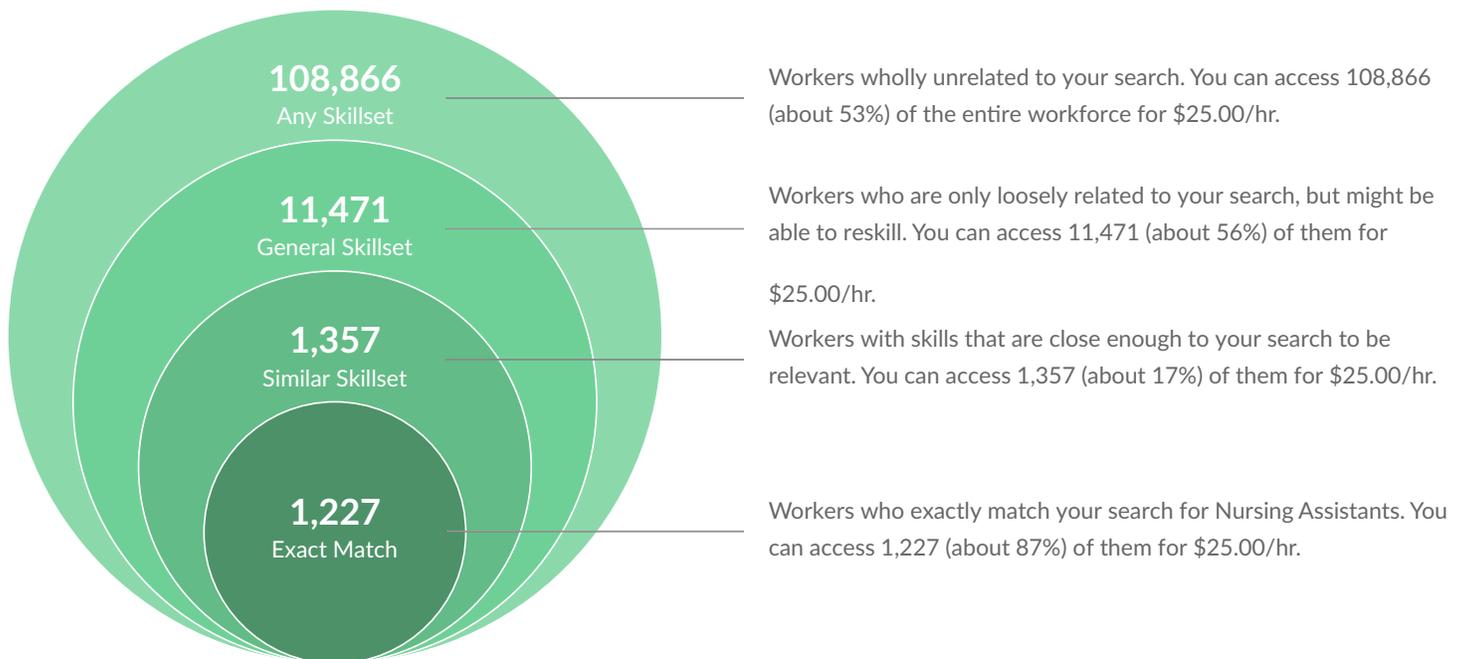

### Class of Worker

QCEW Employees, Non-QCEW Employees, and Self-Employed

The information in this report pertains to the chosen occupation and geographical area.

## Executive Summary

Workforce availability @ \$25.00/hr ranges from 1,227 to 108,866 depending on skills match.

Note: Each layer is inclusive of the layers above it. E.g. “Exact Match” workers are included in the set of “Similar Skillset” workers. This is based on a model that analyzes the overlapping skills between occupations based on job postings over the past quarter. “Similar Skillset” includes workers whose occupations have a similarity score of .75 or greater with your selected occupation; “General Skillset” includes scores of .5 or greater; and “All Occupations” includes the entire workforce.
